SEMINAR NOTICE

Title: “Mitigating Climate Change: Lessons from COVID-19 Pandemic”

Speaker: Prof. J. Srinivasan, Divecha Centre for Climate Change, IISc

Date: June 18, 2020 (Thursday)

Time: 3:30 PM

Abstract: Climate Scientists had warned about the need to mitigate climate change more than 30 years ago. This threat was ignored till recently. The adverse impact of COVID-19 on human life and economy shows the consequence of ignoring the advice of scientists. Those countries that acted early suffered less mortality and damage to the economy. I will enumerate the lessons we can learn from this pandemic. This can be used to convince the policy makers to act early to mitigate climate change.
